***Response to Amendment***

The Amendment filed April 1, 2003 (Paper No. 7) in response to the Office Action of January 1, 2003 is acknowledged and has been entered.

Claims 21-35 were cancelled.

Claims 1-20 are pending.

**The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office Action.**

**New Rejections:**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected as vague and indefinite for reciting "Genbank accession number XP\_011828" (see Claims 1 and 11) as the sole means of identifying the claimed GLUTx protein. The use of accession numbers to identify a particular molecule renders the claims indefinite because laboratories may revise and update the sequences at any time thus rendering the claims indefinite. Further, the claims are vague because an accession number cannot not

Art Unit: 1642

substitute for the exact sequence to which applicant is claiming since there is no amino acid sequence frame of reference.

Claim 11-20 are further rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The claims are not *enabled*, because one of ordinary skill in the art could not use the invention with any predictability because the claims do not specifically limit what is included or excluded by recitation of a GLUTx protein that “comprises the amino acid sequence set forth in Genbank accession number XP\_011828” as set forth in claims 1 and 11 and dependents thereof. Further, it is well known in the art that accession numbers can be altered, deleted, amended, or revised by various inventors such that one of ordinary skill would not be certain what exactly is encompassed by the claimed subject matter.

Applicants argue (Paper No. 7, page 6) that a copy of Genbank accession number XP\_011828 is attached in Exhibit 1. However, the incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486

No claim is allowed.

**All other rejections and or objections are withdrawn in view of applicant's amendments and arguments there to.**

#### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
